Abstract

The Behavioral Theory of the Firm suggests that performance below an aspirational level leads to organizational change and risk-taking. This compelling perspective has been used to explain strategic outcomes as firms' responses to performance feedback. However, there is limited evidence of problematic search effects on various organizational search outcomes. This is attributed to the fact that most research has considered problematic search as a firm-level and relatively routinized process with a high degree of automaticity in firms' responses to performance feedback while overlooking the role of managerial agency. Rather than viewing problematic search as an automatic firm-level process, we believe that behavioral responses are shaped, at least partially, by top executives, notably CEOs. To this end, we first examine whether problematic search effects vary across a range of organizational change and risk outcomes. We then explore whether the relative size of firm and CEO effects varies

5. 推荐工具：注册之后皆可“保存检索条件”，“收藏关注的期刊”，并设置“最新内容提醒”。 (国内平台的介面语言可设置为中文)

The screenshot shows the user account page on the SAGE website. The page is in Chinese and features a sidebar with navigation options and a main content area for managing saved journals. The sidebar includes "我的账户" (My Account), "机构账户" (Institutional Account), "个人详情" (Personal Details), "我的提醒" (My Alerts), "我收藏的期刊" (My Saved Journals), and "我保存的检索" (My Saved Searches). The main content area is titled "我收藏的期刊" (My Saved Journals) and includes a list of journals with checkboxes for selection. The journals listed are AAESPH Review, Acta Radiologica, and Teacher Education and Special Education. There is a "删除" (Delete) button at the bottom of the list.
